Hard Coral

Hard Coral X-Pro advanced formula replenishes all trace elements, daily consumed by hard corals, such as LPS or SPS. Hard Coral offers besides growth, wider opened polyps, strongly expanded coral tissue and brighter colors.

Perfect for use in aquaria with a majority of hard corals.

Use:

Weekly add 1 bottle cap 15 ml per 450 L, or daily 0.7 ml per 100 L. 0.7 ml corresponds to 10-12 drops. In a mixed aquarium of soft and hard corals, a combination of Soft Coral and Hard Coral is recommended and can be applied with an interval of 3-4 days.

Safety measures :

Keep out of reach of children.
In case of direct contact with skin or clothes, rinse immediately.
